

**These instructions are for computers running Windows 2000 or Windows XP only.**

1. Start up your computer with an internet connection at home.
2. Click Start and choose Run. Type in cmd and click OK.

3. At the command prompt, type in ipconfig /all
4. Take note of the MAC address (Physical address) of the connection you will use at school.

5. Once logged in, click on "Registration", then on "DHCP"
